PROJECTS UNDERTAKEN

1. GM (Gabriel Morroff)

Project Name : GM

Technology : Html5, Css3, JQuery, Javascript, Bootstrap5, PHP MySQL.

Role : Backend Developer.

Description: Gm is an under development project based on case management system to deals with plaintiff and defendant , basically it is module as we say GM module and the purpose of this projects his , patients have insurance, but the insurer not provide the money in case that's why patient cases that insurer, so patients have their provider, means like hospital, where patients are admitted , patient cases managed by attorney, they do his task, with the help of activity master, there is many masters in this project like, court master, insurer master, provider master, etc. the attorney give the file to insurer and said you have to pay this , this rupees. With the help of pdf format document but unfortunately insurer not give then attorney case that file into court system then further action take by court . once payment done we have created payment master where who insurer payment given by this patient and this patient related to which providers.

2. ADAPT PI

Project Name: Adapt pi

Technology: JQuery, Javascript, Bootstrap3, Css3, Html5, Php, Mysql.

Role : Full stack Php developer

Description: Adapt pi is a under development project like in which there are two main role is plaintiff and defendant , plaintiff like patient which causes some injury and then they have insurance they want the insurance from defendant , defendant like insurer, but they not give then the plaintiff case for defendant, there are many cases in this pi, and different modules, master and report module present.

3. ENTRUST

Project name: ENTRUST

Technology: JQuery, javascript, Bootstrap3 , Css3, Html5, Php, Mysql, Drupal 6.

Role : Full stack php developer.

Description : Entrust is development project where three department work on each group, group is like firm , each firm have many cases which are shown in case tracker , in case tracker we can track the cases and cases show, three department work is like BPM, LPM, MPM department, each user belong to different different department so we have created user portal so that admin can managed his user , admin can see which user done how many cases, and how many cases pending and we also set timing for each cases, cases is like oher countries criminal record and accidental records and many other record which are handled by

entrust, in this project we have created a case tracker, user portal, user group, filtering of users and cases and added a case status and data migrate with PFS plaintiff fact sheet so this are thing we have done.

4. PFS

Project name: PFS

Technology: JQuery, Javascript, Bootstrap3, Css3, Html5, Php, Mysql, Drupal 6.

Role: Full stack php developer

Description: PFS is a development project. PFS stand for plaintiff fact sheet where LPM department insert a data in each cases that cases comes from entrust , in entrust we additionally add a PFS system. When we click on pfs system then system will be redirect to pfs site, in this pfs we can manage template , firm and merge template so that LPM user can reviewed a document regarding demand letter of each plaintiff, Each firm have different different plaintiff and defendant created and medical record of plaintiff and defendant should be stored into MRS site (Medical Review System), which managed by MPM user and some medical record template merged comes from mrs site because data stored into mrs site so we have mapped the pfs site data into mrs site also.

5. MRS

Project name: MRS

Technology: JQuery, Javascript, Bootstrap3, Css3, Html5, Php, Mysql, Drupal 6.

Role: Full stack php developer

Description: MRS stands for Medical Reviewing System it is a development project. MRS site where user can enter a data of each plaintiff medical from different different department and it review medical record is valid or not for plaintiff and defendant.

6. ADAPT PFS

Project name : ADAPT PFS

Technology: JQuery, Javascript, Bootstrap3, Css3, Html5, Php, Mysql, Drupal 7.

Role: Full stack php developer.

Description: Adapt pfs is a under development project , the main aim of this project is to handle cases and check the case is valid or not valid , the legal department have some protocol to check , but the main things in this project there are many plaintiff and defendant cases each other and many template regarding his client which merge with some merge code. We can date migrate to PFS to Adapt PFS the drawback of pfs is each client have created a many plaintiff so that each plaintiff have new cases and it becomes full load to server that's why we give new feature to adapt pfs where each client can have multiple plaintiff but case should be one so it becomes not load to server.

7. HOSHI

Project name : HOSHI

Technology: Jquery, Javascript, Bootstrap3, Css3, Html5, Php, Mysql, Drupal 7.

Role: Full stack php developer.

Description: HOSHI is a development project, it is a office management system website, where user can see a calendar , user can checkin checkout , user can check his profile, user can check total workhour for single day, and we can give access to every user , if a single user have admin access then admin can add new user and give some credential to new user to use this website , and admin can also change shift time for particular user through roaster module, and we have also developed for hr portal through interview and how many selected candidate and its status. So as a many things we are developed, enhancement and solving errors in this project.
