

Shashank Chhapanimohan

2 years experienced Java Fullstack Developer

Navi Mumbai, Maharashtra

shashankchhapanimohan@gmail.com

+91 7020715458

I am Java Fullstack Developer with Bachelor's Degree in Computer Applications (Computer Science). I have 2 years of total experience as a Java Web Developer in service-based IT organization.

My major role and responsibility include the entire customization part like gathering and understanding customization change requests, designing and developing a particular module as per the change request, testing the flow and customized module under different test case scenarios, and providing live product deployment technical support to the client.

I have the knowledge and hands-on work experience in front-end technologies (HTML, CSS, JavaScript, Thymeleaf, Angular, React, jQuery, JSP), Server-side technologies (Java 8, Spring Boot, Spring MVC, JPA, Hibernate, JSON, XML), and Back-end database technologies (Oracle PL-SQL, MS-SQL).

Preferred Locations: - Pune

Professional Experience

Java Developer (Software Engineer)

L&T Infotech (LTI) - Navi Mumbai, Maharashtra

January 2021 to Present

Project: - MPPMCL Account - PIMS (Power Invoice Management System)

Description: - The purpose of the PIMS application is to provide all automated solutions for managing all types of Power purchase-related documents such as Contracts, Invoices, Bills, etc.

Responsibilities: -

- Handling end to end customization requirements.
- Completing development-related enhancements tickets in an agile way.
- Major responsibilities include understanding Customization requirements from the onsite coordinator, Designing and developing the flow, and testing under different test cases.
- Code improvement and optimization by using the Sonar Lint plugin in Spring Tool Suite/Eclipse. Along with the peer- review technique.
- Implemented new UI theme for the PIMS Application, designed and developed crucial UI segments for Bills and Invoice screens and other modules.
- Implemented end to end major PIMS modules like Contract, Bills and SEA-REA. Also worked on MOD module which required a PL/SQL procedure for generating MOD data on daily basis.
- Monitoring and handling the production deployment of application and providing instant resolution to production issues if any.
- Mentoring the trainee associates and working as a developer for different modules of the PIMS application.
- Providing PIMS Application presentations and hands-on workshops to client and end users.
