## SOURCE CONTROL SYSTEM

- Git
- SVN
- Git-hub
- Bit-bucket

## PROJECT MANAGEMENT TOOLS

- Jira
- Asana
- Trello
- Clickup
- RedMine
- Pivotal Tracker

## DATABASE

- MySQL
- SQL
- Oracle
- PostgreSQL

## Project 1

Project Name	SMS
Description	<ul style="list-style-type: none"> <li>• SMS is school management application with multiple roles including Admin,Parent,Teacher,Accounts, etc.</li> <li>• Teachers and admins can schedule their class with student and maintain attendance for them.</li> <li>• Student reports and fees payment details will be as notification to the respective parents.</li> <li>•Parents can track their child's exam reports and play fees in application itself.</li> </ul>
Responsibilities	<ul style="list-style-type: none"> <li>• Involved in software development life cycle (SDLC) of tracking the requirements, gathering, analysis, detailed design, development.</li> <li>• Actively involved in developing reusable react components.</li> <li>• Design flexible reusable components to reduce line of code and to keep UI consistent across all screens.</li> </ul>
Technologies	Laravel, HTML, CSS, PHP, PostgreSQL, Reactjs, Material UI

## Project 2

Project Name	Utiliko
Description	<ul style="list-style-type: none"> <li>• Utiliko is a CRM application, It has own mailbox to send mail with all options, All types of industry can use this application.</li> <li>• Users can track income and expense detail easily through modules.</li> <li>• Users are able to create estimate, invoices, purchase order.</li> <li>• Payment integration is also part of application with CC/ACH.</li> <li>• Automation concept is also present in this application to reduce user time.</li> <li>• User are able to upload the file into cloud and can maintain those details in file manager.</li> </ul>
Responsibilities	<ul style="list-style-type: none"> <li>• Worked on Automation of projects and tickets based on filters by users.</li> <li>• Involved in creating custom fields in task management, project management, etc.</li> <li>• Worked on projects managements, Tickets managements.</li> </ul>
Technologies	Redis, Reactjs, Material UI, HTML, JavaScript, PHP, Symfony, MySQL

# Project 3

Project Name	<b>Milagro</b>
Description	<ul style="list-style-type: none"> <li>• Milagro is multi-tenant based restaurant management application.</li> <li>• Restaurant's manager and administrator can able to create Smart Menu.</li> <li>• Basically, it's data analytical application to get to know about the customer activities and use them for a marketing purpose.</li> <li>• Contains POS module, HRM, Theme based layouts</li> </ul>
Responsibilities	<ul style="list-style-type: none"> <li>• Used scheduler function to call the API's periodically to achieve automated checkin process.</li> <li>• Planning the production deployment &amp; releases.</li> <li>• Prepared high performance REST API's for the major modules through</li> <li>• out the application.</li> <li>• Wrote cron jobs to manage the recurring calls.</li> </ul>
Technologies	HTML, JavaScript, Reactjs, PHP, Laravel, MySQL
